EX PARTE OR LATE FILED

Confirmed

MAR 19 2003

Distribution Center

Dear FCC Commissioners,

Those of you that revere God and Love His Holy Spirit must plainly see the overwhelming majority of the radio and television media is owned and operated by unscrupulous greedy men that care little to nothing for the general welfare of America and for the morality and minds of America's children they are corrupting. The media moguls are usually apathetic or without conscience, shameless in their degrading the morals and role models for America children and adults to emulate and mature into as they are solicited by the public airwaves.

Keep the Public Airwaves for the best **public good** and general **welfare of the USA** pg. 2

American Television and Radio stations should be locally owned and operated by those who live in their broadcasting area. At least 5% of the broadcast time must be commercial free and be locally produced for local public/civic issues, including citizens, experts, candidates and leaders, all of which should have their debates, briefings and discussions on various viewpoints. Commercials usually reduce attention span and comprehension of information that is being taught.

It is a crime/sin against God and the nation to sell the air-wave broadcasting resources to foreign nations and enemies of America and God. It is a sin to sell a covenant nation as America was to foreign nations and to those who are against God.

It shouldn't take much of your imagination to project the devastating effects of broadcasting media Islamic/Muslim extremist fundamentalism and Japanese station ownership upon the American people's peace of mind. At minimum, the further the owners live from the immediate area of broadcasting, the more carefree/careless coverage of local/civic needs of the local communities.

The sociological/political **consequences** of FCC regulations, including the selling of stations to those who **corrupt** minds and morals for philosophical/ideological reasons instead of serving the public interest in a reverence of God. Without a local personal stake in local politics and the community, a careless, "dumbed-down" warm, cozy, narcissistic comfort-zone type of "news" results to the detriment of the citizens and resulting in coming certain destruction of the nation.

Keep the Public Airwaves for the best **public good** and general **welfare of the USA** pg. 3

Simply, to to make people "feel good" with a care free dumbed down editing of news to a cozy news "interest" magazine programs helps profits.

The politicians/leaders, can't undo the damage done by so much media misinformation, and typical **lack of information**, lack of **facts**, and lack of **expert** opinions along with the ignorant, dumbed-down **mindsets** of the general public in areas of public policy. As a result of such **ignorance** and **myopic** selfish interests, the politicians usually go along with **mob-rule**/democratic policies of **greed** and **hypocrisy** and vote America policy to go to greed, evil and certain destruction/hades by the hands of America's foreign/distant owners in many cases.

In the Bible, Revelation chapter 18 **GOD ALMIGHTY condemns extremist predatory capitalism which eventually results in God's Wrath**, which is America's certain eventual destiny/fate unless you act in behalf of the general welfare of the nation and social benefit of the children and national defense.

In a world where the INTERNET can be easily accessed by naive, easily impressionable children and young adults, the **corruption of their souls, and minds is usually irreversible**. The oftentimes shameless conscience is vivid testimony of corrupting souls is the directive, regardless of money/profits is the true objective of their wicked souls. Simply people love wickedness instead of Love and the Light of God as John 1 has written.

Keep the Public Airwaves for the best **public good** and general **welfare of the USA** pg. 4

Instead of giving everything in the public airwave spectrum in a **"HELL-FIRE SALE"** to the enemies/greed-exploiters of America in the service of greed and myopic ideologues of greed and selling America's soul to her enemies, the righteous **moral LINE MUST BE DRAWN** for the sake of the survival of America and fear of God and that **LINE should be the PUBLIC AIRWAVES that should be ALL RESERVED in public ownership** and not merely a small airwave spectrum for PBS as some propose as a futile gesture that is doomed, unless the FCC and Congress repents of their HELL-FIRE SALE OF the USA.

ALL economists that have studied the general standard of living shows a slow gradual decline of most Americans over the next hundred years to half of the 2,003 A.D. U.S. Poverty Level!

This coming projected fall in the standard of living means disposable/discretionary income/donations for PBS public broadcasting and Christian Broadcasting programs will gradually shrink until they are almost all gone from the public airwaves.

Simply foreign people often work for less money producing cheap foreign goods and services and there are **"NO FREE LUNCHES" in economics.** Certain economic ruin is coming sometime in the future for the USA.

Keep the Public Airwaves for the best **public good** and general **welfare of the USA** pg. 5

Congress, by Damning most of the American people to poverty by "Free Trade" in coming decades has made great sin and error against God, injustice toward families, and it is apt testimony of their failure of duty to the nation.

Keeping the **public airwaves in public ownership will allow the FCC to restore old FCC regulations** to limit ownership of stations, and make Saturday mornings of at least three hours of mandatory educational/entertainment effort for children on ALL across the airwaves for television broadcasts.

Daily time slots of 8:00PM-9:00PM and particularly Saturday night prime time of at least one hour at 8:00 PM in all time zones should be reserved for young adult moral role models/ethics or education on PBS, not for profit stations, of both radio and television.

Also the **Public Service time broadcast over the air requirements could and MUST be RESTORED.**

For without massive over-the-airwaves indoctrination and remedial-education of the American people once again of the great importance of public/civic affairs and public policies in a democracy/civilization, the coming failure and destruction of the nation is certain! Most Americans have now lost almost all interest in the general welfare of others, turning them into myopic selfish "animals" instead of creations/creatures of a loving Creator Jesus and His Father resulting in a lawless deconstruction of Government in the false name of "freedom."

Keep the Public Airwaves for the best **public good** and general **welfare of the USA** pg. 6

Plainly you **MUST SEE** that **men act like selfish animals when it comes to money instead of serving God.** As Jesus warned "You cannot serve money and God!"

Generally, Congress has been passing laws in the worship/idolatry of greed and passing laws to the detriment of National Security to the future destruction of America.

Retaining public ownership of the public airwaves is KEY to the legal battle to maintain FCC MANDATED regulations of commercial free public service programs and local station ownership and "G" General rated channel program content, and content such as NATIONAL SECURITY public service programs, educating people as to the many needs of America's defense requirements.

Also, if necessary, as the Federal BLM agency charges land rent, the FCC could charge "rent" to all "for profit" televisions and radio stations and **make far more treasury revenues than the one-time "FIRE SALE" to God's enemies** of the public airwaves in the name of channel spectrum auctions.

SAVE AMERICA's airwaves for future generations instead of racing America's children to poverty, sociopathic behaviors of immorality, corruption and to the certain coming destruction of America! Amen

A Godly Leader will do what is best for the general welfare of most citizens and for the posterity of the nation and prosperity of future generations.

Keep the Public Airwaves for the best **public good** and general **welfare of the USA** pg. 7

A bad leader will gradually impoverish most Americans standard of living with free trade, reducing their standard of living, then gradually defaulting to global leadership of most enemy nations of God and Mankind in the United Nations and selling America off piece by piece to enemies of America and God.

An example of BAD GOVERNMENT POLICY is the hell-fire inspired sale of the public airwaves. The sociological consequences are completely ignored in the service of money/greed and evil by government.

The Bible has written "God is Light" and instead of respecting God's Spiritual Light and physical light He created and the moral character of children and adults, the Congress has made America a hell/fire-sell so the airwaves and minds of the American people are gradually being sold to devils and in the idolatry of immorality, greed and evil.

For example if the Public Airwaves, remained in government ownership, for the FCC and Congress to restore public service civic requirements of perhaps 15% of all broadcast time of every over the air broadcast of radio and television would be used to indoctrinate, teach and cultivate an interest in civic matters, making the people take a concern by default in civic matters instead of training the children and adults in greed which the Bible has written makes the people accursed in the sight of God.

Keep the Public Airwaves for the best **public good** and general **welfare of the USA** pg. 8

Without government ownership of the public airwaves the souls and democracy are threatened and are in clear danger of degenerating to an oligopoly and quasi aristocracy rule of America by the upper 20% rich class, that are often only concerned about myopic interests of selfishness, advancing immoral behaviors whether for profit or just for their immoral principles, as homosexual immoral behaviors and murders of babies.

Only in the case of medical emergency should there be an abortion of an **infant**.

As mothers decide to murder their babies *their souls are taken captive by the devil* and they vote and think accordingly in most cases. **Murdering mothers become murdering voters in selfishness and greed**, hence the coming gradual collapse and ruin of the democratic form of government.

Poor government policies result from callous citizens whose morals have been largely corrupted by the public airwaves.

For example, if the **public airwaves indoctrinated with truth ideological dogmatism** on civic matters on all points of view, whether for good or for bad, then people would be bombarded by all over the airwave stations with civic interest programs and thus focus that interest in voting in greater numbers.

Citizens/children would be taught by default on every radio and television channel over the air to **take-an-interest as their lives and families depend upon their wise-judgments.**

Keep the Public Airwaves for the best **public good** and general **welfare of the USA** pg. 9

Otherwise democracy is becoming republics of egalitarian greedy oligarchies with persecution and eventual destruction by the U.N. World Government, the inevitable result of such myopic folly by America's leaders. A lively debate usually keeps the audience!

When people are "in-your-face" with public policies/lively-debates, then people are **stimulated to take an interest and focus that energy in productive ways** as a typical general response of the public.

With the coming gradual fall of disposable income and the falling standard of living for most Americans coming, the current and future **donations** to PBS and Christian broadcasting will be falling off, so much so catastrophically, until the complete censorship of silence for the lack of broadcast monies, all caused by the extremist predatory Capitalists of Congress.

The Early Christians practiced some mandatory socialism, as the apostles taught all Christians, it was and remains the clear **will of God Almighty and Jesus for America to practice a little socialism as the Holy Spirit leads you in the use of the airwaves and media.**

(Revelation 18 condemns extremist capitalism with God's capital wrath written in the Bible.)

It is true Hollywood royalty copyright revenues are the single largest part of the failing USA economy in some perspectives, however that is ONLY due to the fact of the total devastation of the rest of the U.S. Economy due to the terrible tragic price of "free trade."

Keep the Public Airwaves for the best **public good** and general **welfare of the USA** pg. 10

The fact America's economy and GDP are "growing" it is only by the BRUTE FORCE of INCREASING THE NATIONAL DEBT BY TRILLIONS. Increasing the future debt to crushing levels and an unbearable burden to America's children and future generations.

The Bible has written, good parents leave an inheritance to future generations, where America's parents are leaving social decay and economic ruin and destruction as their legacy to America's children.

(Please NOTE: the possible, very soon acquisition of Iraq's oil production will offset U.S. Treasury borrowing (as oil sales monies are diverted to the U.S. treasury to pay for the war and rebuilding Iraq) giving a temporary boost to the American economy and to the world economy.)

Hollywood, **by default** by the ruining and "**tanking**" the rest of the economy by free trade, is becoming by default the largest surviving part of the American economy. The rest of the world hates America for it's worship of Babylon Hollywood and corrupting their youth and culture from basic morals and biblical virtues. Hollywood is truly evil in "selling the minds" of America's children and adults.

The FCC should NOT MAKE COPYRIGHT LAWS for HDTV. People should be free to time-shift programs or make archive copies of television and music programs as VCR's and computers do today with freedom!

Keep the Public Airwaves for the best **public good** and general **welfare of the USA** pg. 11

If people sell or illegally redistribute copyright material then prosecute those breaking the law, but don't give into the Babylon Lawyers of evil greed and myopic interests.

In a declining standard of living, for RIAA to sell more music CD's and Hollywood to sell more **DVD's**, they need to **improve** the **sound quality** to the six audio channels **100** Khz sampling rate instead of the mind numbing harsh/grating 44.1 khz current sampling rate standard of CD's.

Better audio and video quality will sell better than today's poor quality audio CD's and DVD's. And if people distribute copies then prosecute as they would people distributing free samples of illegal drugs.

The FCC should not help Hollywood ruin the minds and hearts of the American people with copyright laws in HDTV.

Also "**God is Light**" as the Bible has written and Congress and the FCC selling the lightwaves, as a type of **selling God, selling the minds of children to demons and to social decay** and wasted lives is an unforgivable sin, unless Congress repents of selling the satellites, and lightwaves to God's enemies. Without government ownership of lightwaves future technologies spectrum changes, as HDTV, has required, will be greatly hindered.

Congress should retain federal ownership of lightwaves and lands to provide a godly inheritance for future generations by drawing the "line" at the airwaves as it is your duty to God and to the nation.

Keep the Public Airwaves for the best **public good** and general **welfare of the USA** pg. 12

Let scrambled cable continue as it is, but **SAVE SOMETHING** by saving the over-the-air-lightwaves in respect and **HONOR** of God and also save the public airwaves as your duty to the nation and inheritance of godly future generations.

Without public ownership, broadcasting regulations spectrum changes as HDTV from analog will no longer be possible. Technical spectrum broadcasting standards will be declared unconstitutional by the total confusion in the justice system and by bad judges.

Only a Babylon confusion will result without public ownership of the public airwaves as a **PUBLIC TRUST**, and as a result will be the ruin of society and the greater dysfunction of families and gradual ruin and destruction of the nation.

Congress **MUST** save the children and therefore **MUST** "draw the line" at the broadcast airwaves and keep at minimum the airwaves at the General Audience "G" rating except for news with appropriate children to leave the room with warnings before such bad-news (e.g. graphic violence) is broadcast.

Cable should be the place for "R" rated or worse rated material with all such programs edited for GP to be unscrambled in the basic "family-friendly" package.

By satellite remaining in public ownership, the FCC regulations of local stations being rebroadcast by Dish/Direct TV satellite will be maintained successfully.

Keep the Public Airwaves for the best **public good** and general **welfare of the USA** pg. 13

Without public ownership of public airwaves, future **legal challenges will invalidate MOST FCC regulations**, such as carrying local channels and non-offensive program content.

It doesn't take a lot to delete foul language and immoral scenes to bring a program to compliance with GP usually on cable, some DVD's are already edited for deletion of foul/swearing language.

However Airwaves broadcasts should be restricted in moral content for the basic good character development of the American people as they usually were in the 1960's with biblical/positive heroic role models.

For example, to keep all airwaves broadcasts to "**G**" General audience ratings until late night when it may be suitable to go to **GP** rated programs.

To limit commercials time and ban infomercials on terrestrial public-airwaves, to no more than six minutes per hour and mandate the public service, e.g. time politicians had to discuss public policy to be 10% of broadcast time on all radio and television channels and many other benefits will begin to return America political sanity and reason.

Excessive airwave commercials are generally the case in gradually reducing the attention span to "idiot" levels for most of the public.

Keep the Public Airwaves for the best **public good** and general **welfare of the USA** pg. 14

Excessive commercials is NO JOKE as military brainwashing science/behavior modification methods, by the **flashing thousands** of day-bright scenes reduces people's minds and souls to apathetic selfish sociopathic self-mutually destructive people. Television **Strobe/flashing** to get people's attention instead of **gradual brightness variations** wears peoples eyes and morals down.

ONLY by a steady bombardment/programming of numerous public service programming by many channels on government policies and society's needs, will the American people develop an "interest" in voting and voicing their opinions and solutions for the benefit of government and society.

And Congress should do their part by NOT LOCKING out the American people in favor of listening ONLY to myopic selfish corporations and greedy rich people that usually care NOTHING for the future of America and care little for the betterment of mankind. The Book of James warns rich people rule the poor for bad government policy.

America is dying and how fast America's children die is largely up to you!

It is a sin to disobey the Creator, so **refund** the lightwave auction **funds** and also **regulate** the phone companies by utility commission as other utility rates instead of maximum exploitation for greed and evil.

Keep the Public Airwaves for the best **public good** and general **welfare of the USA** pg. 15

The Bible has written "**God is Light**" so use the lightwaves at least to honor the Creator of the Universe instead of steady program of half truths and therefore diet of defacto lies and general immorality throughout the entire public spectrum.

There is little chance of Congress passing a national service law requirement for all citizens, thus population indoctrination through the public airwaves of the needs of America's dying civilization and government is YOUR ONLY HOPE of restoring democratic processes in America instead of voter apathy and government for myopic greed and evil.

The very rotting of the **FABRIC OF CIVILIZATION is in the hands of the FCC Commissioners** and ongoing ruin of most Americans' families is largely YOUR RESPONSIBILITY!!!

It is your GODLY duty to retain ownership and control of the public airwaves for the general public good welfare as the preamble to the U.S. Constitution has written the Constitution is a "contract" for the public good and not just for the privileged few.

God commands building up government in the Book of Isaiah 9 where increasing the gross size of government is God's command for today.

It was "hardness of Hearts" why Moses "dumbed down" the true Law of God's Love as Jesus said, to paraphrase.

Keep the Public Airwaves for the best **public good** and general **welfare of the USA** pg. 16
Don't dumb-down America for greed of broadcasters!

Instead of deconstruction/deinventing government by turning to competitive economic barbarism with an every falling standard of living and economic Babylon, which is ultimately damned by the Creator in the Book of Revelation.

Capital formation for economic productivity by tax credits for new factories or capital formation for the privileged few rich people? What is your decision for America?

Remember **its' not "YOUR MONEY" or your private airwaves, but "ALL THE EARTH AND ALL IT CONTAINS BELONGS TO THE LORD,"** according to the Bible.

Although some ideologues of plundering the future and treasury for the sake of the rich say "it is your money," in reality it is God's money. It is ONLY by virtue/circumstances of being born by "chance" in America do they have the opportunity to be wealthier than those in history could only imagine in their poverty and misery.

In Isaiah 9:6-7 **godly government will always increase in size** and enhance the general standard of living of the people, and not privatize itself to provide an ever lower standard of living for **most** people and for employees.

Keep the Public Airwaves for the best **public good** and general **welfare of the USA** pg. 17

The Bible warns the poverty/dearth of the nation's people will be accounted by God, as shame and disgrace of the kings/Congress when we all stand before the Creator.

Please do not stand in shame before your Creator in eternity but stand for a richer prosperous America and therefore provide for restoration of public affairs regulations and FCC policies that results in adequate government resources.

Good public policy will result hopefully in global peace keeping military forces, without NATO and the UN and its' eight military organizations that will eventually be turned against the USA, as America gradually falls to economic ruin due to "Free Trade."

Jesus said to help your enemies financially in a way that glorified His Heavenly Father and NOT to build them up to go to wars and eventually destroy the USA. Free Trade is a TERRIBLE CURSE that will eventually result in World War III.

America is being "dumbed down" by the blind greed worship of money by broadcasters instead of educating the electorate so the democratic/republic government of America might not "perish from the face of the Earth," literally!

They want to keep market share at the cost of the truth, facts, **who, what, where, when, and how the news happened should be the standard in the fairness doctrine.**

Keep the Public Airwaves for the best **public good** and general **welfare of the USA** pg. 18

People are being bombarded with **copyright dogmatism**, so much so, that people are in fear of doing extensive researching and making copies harming academic research and publishing and simple students studying.

Terrible spirits of unfounded greed and fear are driving students to turn away from studying as copyright dogmas and royalties make it increasingly difficult to study. Students should be taught to study, not just for their benefit, but for the selfless sacrifice for others as Jesus sacrificed everything for our lives!

The FCC and Library of Congress should be mandated by Congress to get these older nonfiction/education e.g. k-12 books on the **Internet** as soon as possible so they may be freely read world wide.

The **original fourteen years federal copyright protection in the constitution should be more than adequate for today**, as most technology is outdated/obsolete in about ten years by most engineers/scientists will testify. The current fifty years past the author's death will condemn most people to ignorance and history's lessons lost for the children. **America's lost generations of "x,y,z" generations are legendary and soon will result in the total ruin of the nation.**

The FCC should require **at least one channel** of every multiple channel terrestrial public airwave TV station to carry K-12 programming to educate an increasingly dumber and dumber American people and also it would home schoolers and those seeking job skills.

Keep the Public Airwaves for the best **public good** and general **welfare of the USA** pg. 19

The FAIRNESS DOCTRINE needs to be enforced as the total LACK of scientific facts to support the evolution of life from simple to complex, shows ZERO TOLERANCE for biblical truth and morality to be an ungodly policy of public broadcasting and the FAIRNESS DOCTRINE should require rational academics/scientists that recognize the truth and represent the truth in an era where truth and soon the nation's life will be eventually lost.

Congress should also fund putting on the INTERNET, as a lower priority the older movies and radio programs for the social evangelism of the entire Earth into the "melting pot" of American ideas and philosophies as typified by older movies and radio programs.

Prioritized for better **character development** **better foreign citizens' behaviors.**

Just as libraries throw out older books, due to age or lack of general interest, **they should be put on the Internet by the Library of Congress so to entice or interest the rest of the Earth's nations in America's entertainment, education and ethics.**

With more propaganda of America's literary perspectives then global peace and respect for the USA will often be the result.

Select K-12 school textbooks and older books, movies and music should be put on the Internet by the Library of Congress and Department of Education.

Keep the Public Airwaves for the best **public good** and general **welfare of the USA** pg. 20

These should all be on the internet for character development, for good role models and for information must be targeted in such volumes and effectiveness as World War II propaganda efforts were then.

Talking/writing on the internet is much better than war through foreign ignorance and national isolation through greed and the merciless greedy extremist capitalistic system of Babylon America, Revelation 18.

Repeat, these older nonfiction books and encyclopedias should be made FREE on the INTERNET! FREE to the whole world as a cultural reconciliation effort and also to turn the tide of dumbing down the public schools and the general electorate.

I have a very slow DSL Broadband connection which is only about three (3) times faster than a typical 56K modem dial up connection.

I pay a huge \$39.95 per month for just the ultraslow DSL broadband service for my Apple computer. The DSL ISP company claims a **theoretical** 160k/s Download speed and 80 K/s upload **modem** speed in their advertising brochure.

The voice telephone feature to "condition" the telephone lines to handle the DSL modem charged to the DSL company by the phone company alone costs \$32.95 per month.

This is a tariffed charge.

Keep the Public Airwaves for the best **public good** and general **welfare of the USA** pg. 21

This FCC tariff charged should be a socialized/subsidized \$5 per month for the low bandwidth "life-Line" service that poor people/low income need to be productive citizens for the betterment of the nation and for their personal betterment.

A **LIFE-LINE service** of my speed connection should be provided to **all** citizens at zero profit, at cost, and socialized across the community based upon the ISP's actual costs of delivering low speed BROADBAND DSL.

There are DSL HIGH SPEED packages for those with lots of money, however most people's standard of living is falling.

Just as Public Power generally provides lower cost electricity and good quality service, there should be a socialized LIFE-LINE level of service for low speed DSL.

The Disciples of Jesus started practicing socialism in the Early Church in the Book of Acts 2, however the doctrine of mutual distribution of resources was lost as persecution made any economic model impossible to implement as the Christians were all banned from Jerusalem or imprisonment or death would result.

EXTREMIST Competitive Predatory Capitalism is a fast-track route to third-world barbarism, poverty and suffering in the USA and is totally condemned in Revelation 18 by **God's Wrath**.

God's wrath is coming against America unless the leaders stop sinning by greed/idolatry worship instead of Jesus worship.

Keep the Public Airwaves for the best **public good** and general **welfare of the USA** pg. 22
Please implement non competitive socialized LIFE-LINE DSL telephone line for the
poor and needy and for the good of the nation.

Dial up internet service routinely disconnects and involves substantial waste of
time in dial up time to reconnect to the internet.

**The Bible has written to "redeem the time" and not "WASTE PEOPLE's
TIME WITH SLOW internet connections or commercials!" Amen**

Economists sometimes admit "Economics is an Art and NOT a Science." Now the
decision is yours of whether to paint an economic future of general happiness or
poverty for the American people.

Many people need larger type fonts for reading on the INTERNET,
especially for those over forty years of age usually have weaker eyes and
maintaining upto **300% larger type fonts on computers that
access the internet** will be a needed blessing to most people
that have weaker eyes.

IE browsers typically have optional type font enlargement to 300%,
however the principle needs to be also **MANDATED by the government (FCC)
for GUI Graphical User Interfaces of all computers.**

People who make copies for "fair use" and research, are being made to
feel as criminals because Congress is helping the devils of Hollywood Babylon
lawyers in their greed, destroy the minds and souls of the children and adults of
America by even using a xerox machine making them to feel as criminals! I
would enlarge entire books for reading.

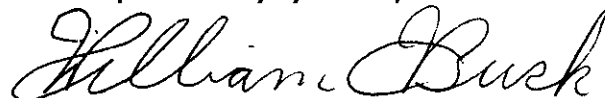

Keep the Public Airwaves for the best **public good** and general **welfare of the USA** pg. 23

However Congress has made it a crime to photocopy and digital copy entire books for easy reading with expanded pages and larger type fonts. **Revelation 18** has written it is a **sin to "sell the minds, souls, and bodies of men,"** as America does!

America is becoming an empty dream/nightmare with terrible poverty the destiny for most Americans by careful analysis due to "free trade" treaties. The fault and responsibility is that of a mostly reckless Congress and White House and FCC and other agencies who oftentimes care nothing for the future of America as indicated by their laws and actions.

You have a real choice of life or death for America's civilization, culture and future, **I beg you to choose life for America's children and future.**
Amen

Grace, Respect and Love always in Jesus,
Respectfully yours,
